## All parts, all makes

### TVH PARTS

**TVH Parts** is your one-stop shop for material handling, industrial and agricultural equipment parts and accessories.

Be amazed by our extensive range of attachments and internal transport equipment. In addition to the own brands such as TotalSource®, CAM System® and Energic Plus®, TVH has also entered into partnerships with top quality brands.

You are sure to receive the best service, and a guaranteed delivery within 24/48 hours.

### TVH EQUIPMENT

**TVH Equipment** consists of 3 activities: Sales, Rental and Service. The Sales Division deals in new and second-hand lift trucks and aerial work platforms.

With its short- and long-term rental of forklifts and aerial work platforms, the Rental Division is mainly active in Belgium. Additionally, our Service Division provides specialist support both in the field and in our own workshop.

# good reasons for **VARIOfit**

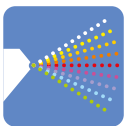

## Modular system

Four basic platforms of different sizes form the base for sturdy bolt-on fitting of almost all superstructures. **VARIOfit**® products bearing this symbol allow trouble-free modification to cater for changed requirements. This keeps **VARIOfit**® affordable for the customer and ensures that it maintains its value.

## Special orders!

**VARIOfit**®, as the name suggests, stands for unusually variable trucks and trolleys. In addition to its special product variants, **VARIOfit**® offers virtually unlimited possibilities for modification to suit customers' individual wishes.

## Powder coating

After thorough preliminary treatment, **VARIOfit**® products are powder coated, then stove enamelled to optimise and enhance their surface finish. This makes them resistant to impacts and scratches and gives them the robustness they need for a long service life.

## Easy-running wheels

with wheel brakes and castor foot guards: Thanks to their new wheels with thermoplastic tyres, **VARIOfit**® trucks and trolleys leave no marks even on light-coloured floors. Their sealed precision ball bearings of deep-groove design are not only robust and impact-resistant, but also extremely easy-running. And it goes without saying that their swivel castors are equipped with wheel brakes and foot guards as required by EU standards.

## Innovative L-section frames

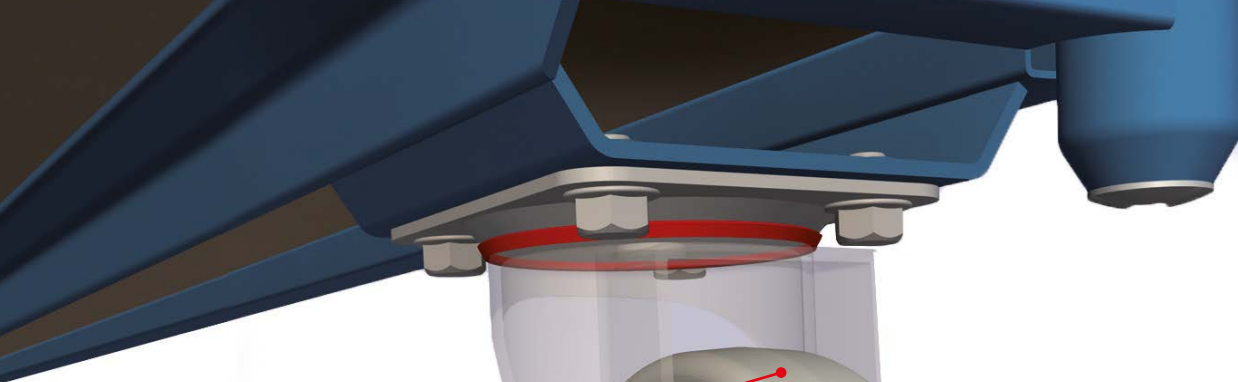

Only **VARIOfit**® trucks have the L-section frame developed exclusively by Cordes to ensure maximum load-bearing capacity. This specially designed frame makes Variofit trucks and trolleys extremely robust and light.

## TÜV mark

TÜV (the German technical inspection authority) stands for quality and safety. Most **VARIOfit**® products bear this mark. The TÜV mark can be awarded to trolleys with a payload of up to 500 kg and trucks with a capacity of 250 kg.

**Running surface:**

Grey, non-chalking thermoplastic rubber.

**Thread guard:**

Minimises uptake of threads lying on the floor.

**Foot guard:**

Standard equipment, of course.

**Long life:**

Sealed precision deep-groove ball bearings.

**Easy-runner wheel:**

About 50% less initial and rolling resistance.

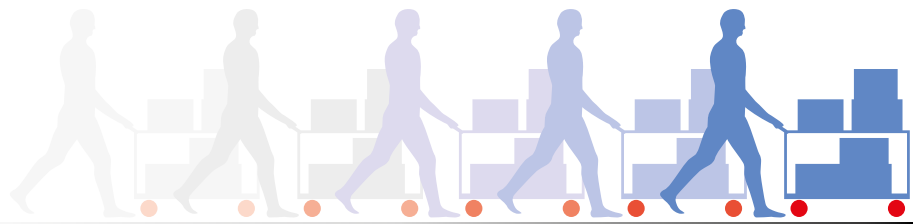

# Easy runners, distance **no problem**

With their maintenance-free precision deep-groove ball bearings and optimised tyres, these **VARIOfit®** wheels offer about 50% less initial resistance than normal castors. So the truck is easy to start moving even when heavily loaded. This saves time, money and effort in day-to-day use. And of course only **VARIOfit®** supplies them as standard with the **VARIOfit®** foot guard.

Conventional wheels need a lot of strength to set the truck in motion and keep it moving.

The **VARIOfit®** Easy-runner wheels need a minimum of effort to get the truck moving, even when heavily loaded. That also means less effort when pushing and reduces materials handling times.

Combined with **EasySTOP**, the perfect solution

# Dead man's brake

On pages 34, 35 and 85 you will find products with our **VARIOfit®** dead man's brake

- Convenient handling
- Safe steering with brake released
- Stops instantly if push-/ pull-bar is released
- Braking possible in all wheel positions
- Firm standing
- No danger of injury due to exposed Bowden cables or protruding metal edges
- Adjustable braking strength

# Central foot brake

All **VARIOfit®** items marked with  Button are fitted with **EasySTOP** central brake system as standard. **No Surcharge!**

### Wheelsize

REF	Wheel diam.
	mm
161TA6420	125
161TA6421	160
161TA6422	200

Order numbers for relevant wheel sizes

- **Easy stop:** Simply press the EasySTOP brake once – this arrests both swivel castors.
- **Easy go:** Return the pedal to its starting position – quick and easy.
- **Safety:** Fixed position with easy access by trolley operator permits instant braking
- **Adjustable braking action**
- Pedal can be operated with normal shoes or safety footwear
- Braking always possible regardless of wheel position
- **Ergonomic:** Light actuation, short travel
- **Compatible:** Available for most types of castor in common use

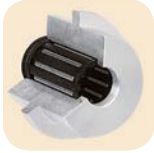

# Wheel types / layouts

**Plain bearing:**  
**Simple, largely maintenance-free bearing.** Impact-resistant. Polyamide bushing. Suitable for operation in wet conditions. For low-speed trucks and trolleys.

**Roller bearing:**  
**Robust, sturdy, largely maintenance-free bearing.** Low bearing friction. Impact-resistant. Permanent lubrication. The most widely used bearing for low-speed trucks and trolleys.

**Deep-groove ball bearing:**  
**Precision ball bearing, easy-running, even with heavy loads and at higher speeds.**

Swivel castors with top plates,

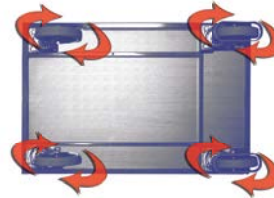

bolt-hole castors

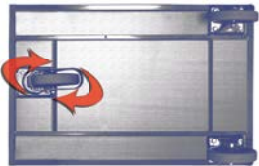

**What is a castor?**  
**A castor consists of at least one wheel, a fixed or swivelling fork, an axle and a means of attachment (e.g. to a truck or trolley).** There are four basic types of castors. Swivel castors with top plates, fixed castors with top plates, bolt-hole castors, and swivel castors with spigot.

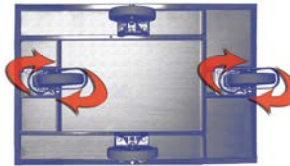

**Two swivel and two fixed castors**  
- Commonest layout  
- good directional stability  
- good cornering

**Four swivel castors**  
- Highly manoeuvrable, suitable for cramped conditions  
- improved directional stability thanks to lockable swivel castors

**One swivel and two fixed castors**  
- Suitable for light loads  
- highly manoeuvrable  
- tends to tip if load concentrated at front

**Two swivel and two fixed rollers, rhombic layout**  
- Fixed castors are slightly higher  
- good directional stability  
- tends to tip if load concentrated at corners

Pneumatic wheel		Polyamide wheel		Solid-rubber wheel	
	Suitable for uneven ground, e.g. with differences in level, especially outdoors.		For use on level ground in wet areas.		Recommended for heavy loads even on poor ground and with sensitive payloads.
- Roller bearing - low carrying capacity - good ride comfort - abrasion-resistant		- Roller bearing - high carrying capacity - resistant to chemicals (salts, fats, acids, alkalis)		- Deep-groove ball bearing - high carrying capacity - low noise - low rolling resistance - high wear-resistance	
Electrostatic discharge wheels (ESD)			Polyurethane wheels		
	Suitable where there is a need to prevent static charging of the trolley and payload.	For use in the industrial sector with heavy loads and for mixed indoor/outdoor applications. Polyurethanes can be selected specifically for your field of application.			
			<b>96° Shore</b> Particularly suitable in high-friction situations, e.g. for motorised trolleys.		<b>92° Shore</b> Suitable for high-stress situations on rough ground, e.g. thresholds and outdoor areas.
		- Deep-groove ball bearing - high carrying capacity - low noise - high abrasion resistance - high cut resistance - low rolling resistance - high wear resistance		- Deep-groove ball bearing - high carrying capacity - low noise - high abrasion resistance - high cut resistance - low rolling resistance - high wear resistance	

# Additional articles

**Accessories to catalogue programme. The prices shown are the additional price when ordered with articles from the catalogue. Prices when ordered separately available on request. Additional prices for wheels are for 1 set = 4 wheels instead of standard wheels (solid rubber).**

Even the standard **VARIOfit®** wheels with grey thermoplastic tyres cater for a wide range of applications. They are suitable for a variety of surfaces and are resistant to a large number of aggressive substances (e.g. numerous oils, gases, acids, solvents and organic substances).

**Pneumatic wheels (Caution: lower carrying capacity) Set**

**VARIOfit**  
The perfect form  
of transport

We have fitted out a **VARIOfit**® shelf trolley to give you at least a small idea of the huge range of **VARIOfit**® products. You will be impressed by the great variety of sack trucks. Experience our **EasySTOP** braking system and the smoothness of the precision deep-groove ball bearings used in our wheels. Read all about the thermoplastic wheels that you can find under many of our **VARIOfit**® products. Our trolley also contains a selection of the proven Cordes solutions for storage and transport of bulky goods. We will be glad to supply a presentation trolley for your showroom. Just call us.

Swivel castors with wheel brakes!

## Material stands with hand crank

Welded steel construction; Load surface with edge on one side, 20 mm high; Platform bolted to frame, permitting variable extension with other types of platform; Zero-play adjustable telescopic system, self-locking; continuously adjustable by hand crank; Platform height adjustable even under full load; Powder-coated RAL 5010 gentian blue; permanent surface protection; impact and scratch resistant; Solid-rubber wheels 75 mm, 4 swivel castors including 2 with wheel brakes

Adjustment  
of tolerance  
with a screw

Platform is screwed on the  
basis, therefore variable  
adjustable with other types of  
platform. Tilts to 15° and 30°.

### Material stand with hand crank 655 - 1045 mm, sloping 15° and 30°

Swivel castors with wheel brakes!

# Table transporter

## Table transporter

For ergonomic shifting and transport of tables up to a length of ca. 1700 mm; Cuts working time by at least half! For diagonal and length wise transport; Depth of immersion: max. 850 mm under the table; Underclearance of table: min. 635 mm

**Saves min. 50 % work!**

Table support with rubber pads. Guaranteed non-damaging engagement and non-slip transport.

Lift is automatically locked in final position. The table is lowered by operating a release lever on the pushbar.

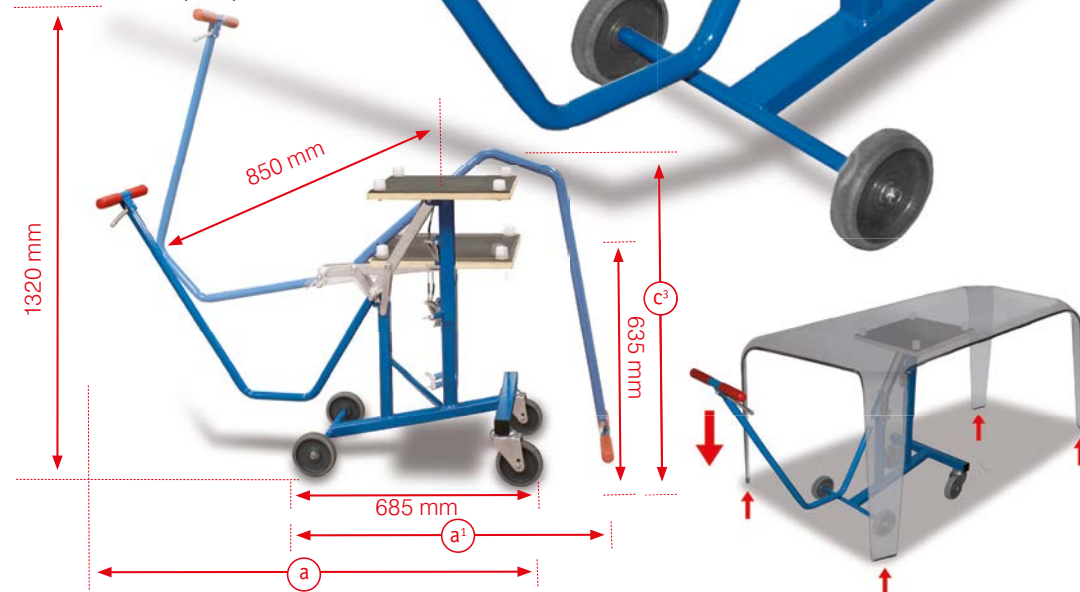

Pushbar clamp

Swivel castor with thermoplastic tyre. Maintenance-free precision deep-groove ball bearing.

Measurements with pushbar folded approx. 870 x 860 mm (W/H)

Chair truck page 80

Tyrehandling

# Tyre trucks

## Tyre trucks

Tyre truck for tyre diameter 540 - 820 mm; with wheel protection guards; Makes it easy to pick up, transport and set down whole stacks of tyres; Pneumatic or solid-rubber tyres on pressed-steel wheels with plastic wheel cap; Rolls very easily and quietly thanks to maintenance-free precision deep-groove ball bearings with dust seals. Galvanised versions of all tyre trucks are also available

### Tyre trucks high

REF		Dimension			Weight	Load cap.	Wheel diam.
		mm					
		a	b	c	kg	kg	mm
137TA1820	P	745	760	1600	22,0	200	260

# Aluminium and tubular-steel trucks with **puncture-proof** wheels

## Puncture-proof wheels

Aluminium or tubular-steel truck with puncture-proof tyres of heavy-duty cushion rubber, a more comfortable and more profitable alternative to pneumatic tyres. The puncture-proof tyres cushion shocks, absorb vibrations and have excellent directional stability. No more tedious checking of tyre pressures, no worries about nails, glass or kerbstones. On pressed-steel wheels with precision deep-groove ball bearings and wheel cap, they are the ideal tyres for heavy loads and day-to-day use. Lasting up to 5 times longer, they offer greater cost-effectiveness combined with greater operational reliability.

**Industrial trailers**

Extremely robust, pulse-welded steel-section construction; with rounded corners; the steering system is of turntable design with heavy-duty precision deep-groove ball-bearing; steering ring with safety stop in accordance with German accident prevention regulations (UVV); Maximum speed: 6 km/h; Painted RAL 2004 pure orange; Heavy-duty wheels in robust welded-steel construction with elastic solid-rubber tyres or heavy-duty pneumatic wheels with industrial tread; Welded drawbar with retaining system in accordance with German accident prevention regulations (UVV) (for safety reasons all drawbars are pulse-welded, as this permits very homogeneous welds). Standard drawbar eye for 35 mm coupling bolt (offset drawbars or drawbars with swivel eyes also available on request); Caution: if the customer does not specify the height of the drawbar jaw, we accept no liability for ease of coupling of the trailer; The wheels are heavy-duty pneumatic wheels with industrial tread or heavy-duty wheels of unbreakable welded steel construction with elastic solid-rubber tyres; The hubs are fitted with dustproof encapsulated, pre-lubricated bearings in accordance with DIN ISO 355 or 15-1981; Painted RAL 2004 pure orange
