TVH HISTORY

Dear customer,

More than 45 years ago, in 1969, the success story of TVH began. Mr Paul Vanhalst and Mr Paul Thermote, neighbours and school friends, joined forces and started with the purchase and repair of agricultural machines and used lift trucks.

Increasing industrialisation led to a growing need for lift trucks and lift truck parts. Slowly but surely, TVH was growing into a global player, thanks to the success of the product and customer service, but also thanks to acquisitions.

After all these years, the business is still in family hands and has grown from 2 founders, to a workforce of almost 4500 employees worldwide, in 5 continents. The day-to-day management has now been handed over to the second generation.

TVH has two business units: Parts & Accessories (TVH Parts NV) and Equipment (TVH Equipment NV). TVH Equipment is a specialist in second-hand lift trucks and aerial work platforms.

TVH Parts is your all-round supplier of quality parts and accessories for material handling, industrial vehicles and agricultural equipment.

You get fast answers on any offer, order or technical question from our dedicated sales and technical departments. We continually expand our product range by following new trends and looking for new partnerships, to make sure you will find absolutely everything you need right here at TVH.

STANDARD TRACTION WHEELS

How to identify your wheel?

- Step 1:** count number of bolt holes
- Step 2:** measure diameter of center hole (in mm)
- Step 3:** measure wheel diameter (in mm)
- Step 4:** measure wheel width (in mm)

REF [141TA3233](#) – 18 kg

REF [140TA8781](#) – 50 kg

Product description:

A multipurpose extreme-pressure grease, formulated for the lubrication of all kinds of industrial applications, operating in wet and dusty and/or dry conditions. Also suitable as EP multipurpose grease, in “off-road” applications where water is in frequent contact with the grease, e.g. pin-bushings, Crown and Caterpillar wheels on excavators.

Always avoid contamination of the grease by dust and/or dirt when applying. Preferably use a pneumatic pump system or cartridges.

Specifications:

Advantages:

- Because of its true multipurpose character it may replace a wide range of greases, allowing stock rationalization and simplification of maintenance
- Forms a durable lubrication film, resulting in reduction of maintenance and down-time costs
- Miscible with most other conventional soap greases
- Excellent mechanical stability avoiding ejection or loss of consistency during operation
- Excellent adhesion to metal
- Good thermal stability, leading to high resistance to temperature variations
- This grease does not contain lead, or other heavy metals considered harmful to human health and the environment
